## **Gov. McCrory lays out plans in State of the State address**

The main event of the legislative week came Monday evening when Gov. Pat McCrory delivered his State of the State speech to a combined session of the General Assembly.

Gov. McCrory noted that improving government efficiencies was one of his main goals. SEANC Executive Director Dana Cope called on McCrory to “involve state employees at the table when working to improve government,” adding, “State employees who perform the services are the experts in what works and what doesn’t.”

Budget Appropriations subcommittees continued their overview of agency budgets this week. SEANC has been in attendance at subcommittee meetings and speaking with lawmakers on those committees about state employee issues.

SEANC also continues to reach out to administrative leaders in various agencies on behalf of our members.

No bills of significance to state employees or retirees were filed this week.
